**American Waste &
Recycling**

Press Release

American Waste & Recycling expands in Jackson, Barrow and Hall Counties with the purchase of the front load routes of 211 Disposal and the permanent commercial roll off accounts of J&J Disposal.

Increasing our foothold in these counties proved vital to our market strategy, increasing the density of our routes and widening our market footprint.

Gainesville, GA, June 1, 2011: Locally owned and operated American Waste & Recycling purchased the front load commercial dumpster routes from 211 Disposal in Winder GA. This acquisition widens our reach to over three counties and expands our customer base by 90 accounts. The sale was completed on May 1, 2011 and was routed and integrated into our existing routes. This acquisition is the second this year for the two year old company, as it also purchased the commercial permanent roll off accounts of J&J Disposal on June 1, 2011 located in Gainesville, GA. Our American Waste & Recycling unique approach, a "No Fees" business model, continues to attract attention across its market area and has increased its market share.

For Release 9 a.m. EDT, June 1, 2011
